Oracle Timesten In Memory Database  
Oracle TimesTen In-Memory Database  
(TimesTen) delivers real time application  
performance (low response time and high  
throughput) by changing the assumptions  
around where data resides at runtime. By  
managing data in memory, and optimizing  
data structures and access algorithms  
accordingly, database operations execute  
with maximum efficiency achieving  
dramatic gains in responsiveness and  
throughput.

TimesTen In-Memory Database FAQ -  
Oracle

TimesTen is a relational database with objects like tables, indexes, sequences, views, materialized views and PLSQL packages and procedures. As TimesTen is an In-Memory Database, these objects are always in memory all of the time to enable extreme performance. These objects are also stored in the file system for persistence.

The TimesTen In-Memory Database provides excellent performance on even commodity hardware. RDBMS performance has two important factors, latency and throughput. Latency is about how fast SQL Select, Insert, Update, Delete or Merge operations can be completed. TimesTen is known for enabling really low latency SQL transactions.
