

Package Timeroc The Comprehensive R Archive

Getting the books **package timeroc the comprehensive r archive** now is not type of challenging means. You could not solitary going following book accretion or library or borrowing from your contacts to way in them. This is an certainly easy means to specifically get guide by on-line. This online publication package timeroc the comprehensive r archive can be one of the options to accompany you later having further time.

It will not waste your time. assume me, the e-book will very look you supplementary business to read. Just invest tiny become old to entrance this on-line statement **package timeroc the comprehensive r archive** as skillfully as evaluation them wherever you are now.

Package Timeroc The Comprehensive R

Package 'timeROC' December 18, 2019 Type Package Title Time-Dependent ROC Curve

and AUC for Censored Survival Data Version 0.4 Date 2019-12-18 Author Paul Blanche

Maintainer Paul Blanche <paulfblanche@gmail.com> Description Estimation of time-

dependent ROC curve and area under time depen-

Package 'timeROC' - The Comprehensive R Archive Network

timeROC: Time-Dependent ROC Curve and AUC for Censored Survival Data. Estimation of time-dependent ROC curve and area under time dependent ROC curve (AUC) in the presence of censored data, with or without competing risks.

CRAN - Package timeROC

Estimation of time-dependent ROC curve and area under time dependent ROC curve (AUC) in the presence of censored data, with or without competing risks. Confidence intervals of AUCs and tests for comparing AUCs of two rival markers measured on the same subjects can be

Download Free Package Timeroc The Comprehensive R Archive

computed, using the iid-representation of the AUC estimator. Plot functions for time-dependent ROC curves and AUC curves are ...

Package Timeroc The Comprehensive R timeROC: Time-Dependent ROC Curve and AUC for Censored Survival Data. Estimation of time-dependent ROC curve and area under time dependent ROC curve (AUC) in the presence of censored data, with or without competing risks. CRAN - Package timeROC Package Timeroc The Comprehensive R CRAN - Package timeROC. Estimation of time-dependent

Package Timeroc The Comprehensive R Archive

Inverse Probability of Censoring Weighting (IPCW) estimation of Cumulative/Dynamic time-dependent ROC curve. The function works in the usual survival setting as well as in the competing risks setting. Computation of the iid-representation of areas under time-dependent ROC curves is implemented. This enables computation of inference procedures: Confidence intervals and tests for comparing two ...

timeROC function | R Documentation

timeROC: Time-Dependent ROC Curve and AUC for Censored Survival Data. Estimation of time-dependent ROC curve and area under time dependent ROC curve (AUC) in the presence of censored data, with or without competing risks.

Package 'timeROC'

Provides functionality to define and train neural networks similar to 'PyTorch' by Paszke et al (2019) < arXiv:1912.01703 > but written entirely in R using the 'libtorch' library. Also supports low-level tensor operations and 'GPU' acceleration.

CRAN - Package torch

An object of class "ipcwSurvivalROC" or "ipcwcompetingrisksROC" previously estimated from the timeROC function. FP. In the competing risks setting, a numeric value that indicates which definition of AUC is plotted. 1 for definition (i) and 2 for definition (ii). (See details of timeROC function for definitions (i) and (ii)). Default is FP = 2. add

plotAUCcurve function | R Documentation

In timeROC: Time-Dependent ROC Curve and AUC for Censored Survival Data. Description Usage Arguments Details Value Author(s) References See Also Examples. View source: R/compare_ipcwROC.R. Description. This function computes the p-value for testing the null hypothesis that asserts that two time-dependent AUCs of two markers are equal.

compare: Compute tests for comparing two time-dependent ...

The lowess function performs the computations for the LOWESS smoother (see the reference below). lowess returns a an object containing components x and y which give the coordinates of the smooth. The smooth can then be added to a plot of the original points with the function `lines`.
Alternatively, `plot` can be called directly on the object returned from `...`
